Turn Back Time with a Holistic, Safe and Natural Alternative to Surgery!

NEW LLLT Tissue Regeneration

Light is an essential component in our lives, but did you know that apart from helping us to see, it can also help us to reduce bodily pain and accelerate tissue repair and healing?

Research shows that through the coherent light of Low Level Laser Therapy (LLLT) the cells of your body communicate with each other, giving a regenerative effect on the body. This is backed by clinical evidence-based research which proves the effectiveness of LLLT and the fact that it has been used for over 30 years with no known side-effects.

What is Low Level Laser?

Low Level Laser Therapy (LLLT), also known as Photobiomodulation, is an advanced medical technique that uses light in the form of 'photons' to stimulate the body at a cellular level which then promote cellular function.

As it uses cold (non-thermal) laser to speed up cell regeneration, it is a safe and extremely effective treatment for a number of skin and body conditions which include reducing pain and inflammation, and accelerated tissue repair. LLLT provides an effective, non-invasive and painless holistic option for natural-looking cosmetic enhancements; like a natural facelift without the risk, expense, side-effects or inconvenience of surgery. It is also an excellent natural option for acne, including acne scarring, keloid scarring and much more. More noticeable and longer-lasting results are achieved when LLLT is used in combination with active medical grade products and in combination with other advanced skin treatments.

How does it work?

Lasers are highly-focused light, and medical-grade cold lasers in particular are used to promote cell stimulation and renewal without heat or discomfort to the affected areas, either on or within the skin.

Similar to how the skin absorbs sunlight to produce Vitamin D, when laser light is applied to the skin, the cellular energy ATP (Adenosine triphosphate) levels increase in the Mitochondria (powerhouse of the cells), promoting cellular function including tissue repair, inflammation and pain relief assisting the body in bringing cells back to order from chaos. *(Continued above right)*

This regeneration of damaged tissue, encourages cellular renewal, collagen and elastin growth as well a decreased inflammation, redness, pain and discomfort. With age our body loses much of its ATP, which is needed for the life enhancement process of every cell, similar to a battery gradually losing its charge. This leads to the breakdown of collagen and elastin in our skin, leading to saggy and uneven skin texture with the inevitable result being lines, wrinkles and folds.

LLLT's red and infra-red wavelengths make the laser powerful enough to penetrate into nerves, muscles and other tissues allowing it to work on a much deeper level. As the damaged area regenerates, it becomes noticeably stronger with increased lymphatic drainage and faster recovery.

Who can have this treatment?

The gentle healing nature of the therapy allows it to be used for almost everyone, anywhere on the face or body, for all skin types and conditions. The few exceptions include thyroid areas, the fetus area on pregnant women, the head of infants, over suspected tumours/cancers or on people using photo-sensitive or immuno-suppressant drugs. *(Continued overleaf)*

INTRODUCTORY PACKAGE!

INCLUDES LLLT & Advanced Skin Treatment

Instantly Visible Results of Cell Regeneration
For a Lifted, Toned, Tightened & Revitalized Skin
With **NEW** Low Level Laser Therapy

BEFORE

AFTER

"Turn Back Time and Relax Pack" includes:

- Professional Diagnostic Skin Analysis (\$100)
- Skin Smoothing Advanced Skin Treatment Face (\$110)
- Anti Ageing Laser-lift Regeneration Face & Lower Jaw line (\$300)
- Hyaluronic Acid, Peptides & Antioxidant boost
- Eye Cream, Moisturiser & Sun screen

● PLUS a FREE \$20 OFF GV towards Your Next Anti Ageing Laserlift Regeneration Face Treatment

Valued \$530 | For ONLY \$199 | Save \$331

Only 19 packs available. Limit 1 per client. Conditions Apply. Book Now.

- ADD Anti Ageing Laser-lift Regeneration Neck \$100 (Normally \$200)
- ADD Sonophoresis Hyaluronic Mask Infusion \$50 (Normally \$100)
- ADD Radio Frequency Face & Sonophoresis Hyaluronic Mask Infusion \$175 (Normally \$400)

Dermapen Rejuvenation Pack

This skin rejuvenating treatment includes:

- Professional Diagnostic Skin Analysis (\$100)
- Dermapen Needling Face (\$350)
- ENAR Lymphatic Drainage Treatment Face (\$60)
- Stem Cell & EGF + Peptide Serum Booster Infusion (\$20)
- Moisturiser Lycogel Protection

Valued \$530 | For ONLY \$359 | Save \$171

Only 7 packs available. Conditions Apply. Book Now.

- ADD Sonophoresis Hyaluronic Mask Infusion \$50 (Normally \$100)
- ADD Dermapen Neck +Sonophoresis Hyaluronic Mask Infusion \$125 (Normally \$300)

Relax and Replenish Pack

This skin rejuvenating treatment includes:

- Professional Diagnostic Skin Analysis (\$100)
- Skin Smoothing Peel (70%) Face (\$150)
- Microcurrent Hydration Ampoule and Peptide Infusion (\$50)
- Relaxing Pressure Point and Lymphatic Drainage Face Treatment (\$30)
- Eye Cream, Moisturiser & Sunscreen

Valued \$330 | For ONLY \$150 | Save \$180

Only 7 packs available. Conditions Apply. Book Now.

Purchase 3 Get 4th FREE

- ADD Microcurrent Bio Mask Infusion and Pure Oxygen Inhalation \$70 (Normally \$120)
- ADD Peel Neck, Microcurrent Bio Mask Infusion and Pure Oxygen Inhalation \$130 (Normally \$120)

(Continued from overleaf)

What can it treat?

LLLT stimulates the body's repair processes, while optimizing the speed of repair in acute injuries and chronic conditions. It successfully treats and manages a wide variety of skin and body conditions:

Skin Conditions

- Rosacea
- Psoriasis
- Burns
- Allergic reactions (such as hives)
- Folliculitis (infection and inflammation of hair follicles)
- Cold sores (Facial herpes around mouth, nose and chin area)
- Hyperkeratosis (thickening of the outer layer of the skin e.g. calluses, warts and corns on the hands and feet)
- Eczema
- Dermatitis
- Acne and acne scars

Scars and Scarring (Body Blemishes)

- Acne scars
- Keloid scars
- Bruising
- Post-operative surgical scars
- Red and mature stretch marks
- Stretch marks (from pregnancy, weight gain and bodybuilding)

How effective is it?

Laser therapy has undergone extensive laboratory and clinical research and testing, with over 3000 clinical studies providing conclusive proof of its effectiveness. It is used to successfully treat a variety of patients across skin clinics, medical clinics, hospitals, universities, fitness and sports institutions, health spas, the military and even NASA.

How many treatments will I need?

Recent injuries normally respond the quickest to treatment, where significant difference is noticed within the first few visits. Long-term conditions normally take longer to respond, especially if they have been present for years. This means noticeable improvement may take anywhere from weeks to months. As your specific condition & its severity determines the number of treatments required, a customized treatment plan is designed during the first consultation where you will be advised of the best course of treatment for your unique situation.

Is it safe and does it hurt?

LLLT is very safe and is 100% pain-free. It does not heat, hurt or damage the skin causing other complication therefore no special care requirements to worry about pre and post-treatment. Both the client's and the operator's eyes are protected with specialist safety glasses during treatment.

Anti-Ageing and Rejuvenation

- Skin revitalisation and firming
- Reduce fine lines and wrinkles
- Refine enlarged pores
- Repair and re-building skin resiliency

Pain Management and Musculoskeletal Conditions

- Arthritis
- Pinched nerves
- Bunions
- Inflamed muscles and joints
- Back, neck and joint pain
- Ankle, knee and hip pain

For Best Results with Anti Ageing Laser Lift

Regeneration: With age, the level of hyaluronic acid (HA) in the skin decreases. At the age of 40 the proportion of HA in the skin has already decreased by half. By the age of 60 only a hyaluron content of 10% remains. The result is loss of volume and elasticity, where the skin becomes dry and wrinkled.

LLLT photons crosslink the medical grade hyaluron gel within the skin, producing a lifting effect that is similar to the Hyaluronic Acid injection method, without any pain or side effects. It offers better results for large areas, is longer-lasting and without any allergic reactions. This increases the skin's volume and elasticity where skin looks visibly lifted, smoother and plumper. Application of a repair serum fortified with antioxidants enhances this regenerative process.

A truly natural, effective and affordable anti-ageing treatment that can be had as a regular skin-rejuvenation treatment for all skin types. Optimum results are achieved when combined or had adjunct to Radio Frequency, Microcurrent, Peels, IPL, Dermapen Needling, Oxygen Facials and Microdermabrasion treatments. As LLLT skin regeneration stimulates collagen and elastin fibers, a remarkable difference is seen just after the first treatment. Cumulative results are best achieved over a series of 6-8 treatments depending on the individuals skin type and condition which keep on improving after every treatment as the stored ATP levels increase and the skin regenerate. Generally treatments are recommended twice a week and thereafter a booster maintenance to maintain the results.
